Notebook Notes: install and customise

Nov 9, 2026 · @Andy

This Skill turns an article's framework, findings, process or rules into what looks like a photo of a handwritten notebook page: ruled, dotted or grid paper, spiral or gutter binding, neon highlighter, coloured pen underlines, circled numbers and arrows, lying on a desk.

Install it in the Claude app

1. **Turn on file creation.** Settings, then Capabilities, then *Create and edit files*. Skills need this on. On Team or Enterprise, an admin may need to allow it for your organisation. The Skill renders the image with code.
2. **Open Skills.** Click *Customize* in the sidebar, then the *Skills* tab.
3. **Upload the ZIP.** Click *+ Add*, choose *Upload skill* and pick `notebook-notes.zip`. Don't unzip it first.
4. **Check it's on.** Open the Skill from your list. The toggle next to *Try in chat* should be on.

Or in Claude Code

Unzip it and move the `notebook-notes` folder into `~/.claude/skills/` to have it everywhere, or `.claude/skills/` inside one project. It renders on your own machine, so it needs Python with Playwright and Pillow; Claude installs them the first time if they're missing.

Make it yours

Open `SKILL.md` and fill in the *Make it yours* block near the top:

Setting	What it does
`pen`, `marker`	The pen and highlighter colours. Use a name (green, blue, yellow, pink) or a hex code from your brand.
`favourite_looks`	Optional: the paper, binding and desk you like best. Leave blank for a different look each time.
`audience`	Who the pages are for. It decides which points from the source make the page.
`voice_notes`	Spelling and style, such as British spelling or sentence case.

Re-zip the folder (the folder, not the file inside it) and upload it again under Customize, then Skills.

Your first page

1. Start a new chat and paste an article, a report or your notes, or a public link.
2. Ask for "a notebook page of the main points".
3. It picks a layout to fit the content (numbered notes, a mind-map flow, a hub or a pyramid), writes 60–140 words of handwritten notes and renders a PNG.

4. Ask for changes in plain English: a different paper, fewer points, another pen colour.

Before you post, check every number against your source. The image carries no signature or link, so put the source article underneath the post.

If something goes wrong

Problem	Fix
Upload fails	Zip the folder, not SKILL.md on its own. The folder name has to match the `name:` line inside it.
No image comes back	Check *Create and edit files* is on under Settings, then Capabilities, and the Skill's toggle is on under Customize, then Skills. In Claude Code, let Claude install Playwright and Pillow.
Text runs over the lines	Ask for fewer points or shorter lines.
