# B2B Landing Page: install and use

Oct 20, 2026 · @Andy

This Skill turns proven B2B conversion principles (attention ratio, message match, awareness-stage ordering) into a workflow Claude runs the same way on every page. It asks three questions, drafts the strategy for you to correct, then writes the copy and builds the page. It refuses to invent your proof.

## Install it in the Claude app

1. **Open Skills.** Go to Customize, then Skills.
2. **Add it.** Click the **+** button, then *Create skill*, and upload `b2b-landing-page.zip`. Don't unzip it first.
3. **Check it's on.** It appears in your list as `b2b-landing-page`. Make sure it's toggled on.

## Or in Claude Code

```
/plugin marketplace add goodvibemarketer/marketing-skills
/plugin install b2b-landing-page@goodvibemarketer-marketing-skills
```

Or unzip it and move the `b2b-landing-page` folder into `~/.claude/skills/`.

## Using it

1. Open Claude Design (it also runs in Claude.ai, Claude Code and Cowork).
2. Select a design system if you have brand colours in mind.
3. Describe your product and what the page needs to do.
4. Answer its three questions, then correct the strategy it drafts. That review is the step that makes the page yours.
5. It writes the copy section by section and builds the page.

If you only want a brief to hand to a designer or developer, say so and it stops after the strategy.

## Make it yours

Open `SKILL.md` and fill in the *Make it yours* block near the top: your company, what you sell, your ideal customer, the buyer roles who read your pages, the proof you actually have, your default call to action, your brand voice and any compliance wording. Re-zip the folder and upload it again. Every brief then starts from your company instead of from zero, and anything you say in a request overrides the defaults for that page.

## What's in the ZIP

| File | What it does |
|---|---|
| `SKILL.md` | The workflow: questions, strategy, copy, build. |
| `references/brief-schema.md` | The shape of the brief it fills in before writing anything. |
| `references/design-rules.md` | The layout and conversion rules the build follows. |

It's three markdown files: no code, nothing hidden. Read the rules before you run it, and edit any you disagree with. Re-zip the folder and upload it again.

## Before you publish

The Skill will not invent customer logos, testimonials or numbers. Where a claim needs proof you haven't given it, the page carries a visible `[PROOF NEEDED]` marker instead. Fill those with real evidence, or cut the section.
